

Supported portal uploaders & management software

All major portal uploaders and management software are supported, so your listings are added automatically. It's that easy - or use our simple listing page to manually add your properties.

Getting started

- 1 Register as an agent at rent.com.au
- 2 Sign in to your 'Account centre'
- 3 Go to your 'Account' page
- 4 Click on the 'Portal uploader' menu item
- 5 Complete and submit the form

We will then notify the uploader with what they need to start sending us your listings. In some cases you may need to configure your system to do this, however we will send you a very simple set of instructions.

Your system not listed here?

We might of already added your system. To check simply visit rent.com.au/agents/uploaders

We have new uploaders added regularly, so if we don't have yours, simply let us know the details and we follow this up for you. In most cases this can be done in just a couple of days. For agent services please contact us at agents@rent.com.au or phone 1300 736 810
